Central University of Technology, Free State

Senior Enterprise Systems Engineer (P7)

⊙ Bloemfontein Campus

RESOURCES AND OPERATIONS | ICT and Computer Services | Ref 1119

About the position

Main purpose of the job

To ensure the stability, integrity, and efficient operation of the in-house and cloud information systems that support core organizational functions. This is achieved by monitoring, maintaining, supporting, and optimizing all networked software and associated operating systems (Windows, Linux, etc). The Senior Enterprise Systems Engineer will apply proven communication, analytical, and problem-solving skills to help identify, communicate, and resolve issues in order to maximize the benefit of ICT systems investments. This individual will also mentor and provide guidance to the Systems Engineer staff

Main tasks

1. Ensure control and implementation of ICT Security (Control Patch management process)	3. Oversee Server and Systems Management (Oversee and implement management of DNS, DHCP, AD, Office365, SCCM, ESET, etc)
2. Provide Infrastructure Support (Maintain and Manage VMware, SAN, Bandwidth, etc)	4. Conduct peer development (Train and Supervise Junior Administrators)

About the appointment

Nature of appointment	Permanent support services
Minimum salary scale (Total Cost to Company)	R754 366 per annum

Note: CUT applies an internal parity model to determine remuneration that complies with the principle of "equal pay for work of equal value". Accordingly, the preferred candidate may expect an offer that is in line with their qualifications and years of similar experience. Please contact the Recruitment office for more information on the applicable salary scale.
