Indemnification

The information in this publication is subject to change. The Central University of Technology, Free State (CUT) accepts no liability of any nature whatsoever, now or in the future, for any damage sustained as a result of such change. The rules, regulations, policies and procedures, as amended from time to time, which are in force on the date of a student's registration at CUT, are applicable to that student.

PREAMBLE

The Central University of Technology, Free State (CUT) is a Higher Education institution (HEI) that aims to provide career-oriented education. Therefore, the University strives to achieve a balance between theory and practice.

As an HEI, CUT is constantly participating in the quest to satisfy the immense demand in the market for graduates with specific qualifications and skills. Towards this end, it strives for excellence in developing new knowledge, and conveying knowledge through career teaching, research, outreach and community service. CUT accomplishes these goals and conducts its activities with a commitment to diversity and the highest ethical standards. Lecturers must employ excellent teaching practices for the exclusive benefit of students.

In addition, CUT advances professional, discipline-specific and general educational programmes through collaboration amongst superior undergraduate, graduate and professional career programmes, and is committed to servicing the public through scientific and technical knowledge.

Furthermore, CUT is constantly improving on processes that are aimed at reducing the costs of operating the University at the most efficient level possible, without lowering the quality of service to students.

The availability of state-of-the-art technology, and the maintenance and expansion of facilities are critical in an environment that is conducive to learning. A number of factors prevail that necessitate the regular review of fees.

Fees are calculated in such a way that there is a balance between the recovery of the cost of tuition, the services received by students in terms of education and other support, and affordability to the community. Fees, including the review thereof, are dealt with in accordance with the approved policy and procedure.

Fees are not established on a profit-seeking basis, but are rather focused on covering CUT's expenses with regard to services rendered.

The objective of this policy is to govern the effective management of financial assistance to undergraduate students at the Central University of Technology, Free State (CUT).

14.1.2 Definitions and abbreviations

- a. **Bursary:** an outright grant made in respect of specified educational expenses.
- b. **Bursary/loan:** a single individual award, of which a fixed percentage will be an outright grant, and the balance repayable after the student leaves CUT, or is no longer registered as a student. Specific conditions are specified by the fund.
- c. **Entrant:** for reference purposes, an entrant is a student who is registering at CUT for the first time.
- d. **Financial aid:** awards from one or more sources offered to a student to supplement his/her family's contribution and external funding, to the level necessary to meet basic costs.
- e. **Loan:** money lent to a student to meet study-related costs, which money must be REPAYED. Interest is charged on loan funds.

- l. **BLFC:** Bursary and Loan Fund Committee.

14.1.3 Policy statement

- a. The University has to balance the increasing financial needs of students against the diminishing financial resources of CUT, and those of external donors.
- b. To achieve this, the Fees and Financial Aid Office carries out functions that relate to the work of Academic Administration, Student Services, and Financial Management and Services, and should maintain a close working relationship with all these units. Financial accountability in ensuring that students are adequately funded is shared between Financial Management and Services, and Fees and Financial Aid.
- c. However, the prime focus of the Fees and Financial Aid Office is on students as individuals with specific needs. As the University's ability to meet students' funding needs from its own resources diminishes, counseling and information services to students would have to be expanded and improved, in addition to the Office's evaluation functions.
- d. To govern the effective management of financial support available to students at CUT, the Fees and Financial Aid Office has developed manuals to:
 - empower students;
 - develop a service that assists with financial deficits, establish an ongoing relationship with students and other components of the support network, and assists with the development of survival skills regarding financial responsibilities for the period of study at CUT; and
 - maintain a good working and service relationship with donors, and determine mid-term operational objectives and procedures for the implementation thereof.
- e. This policy must be read in conjunction with the relevant Financial Aid manuals.

14.1.4 Scope and application

- a. Financial aid awards are **subject to the availability of funds**.
- b. This policy applies to all categories of funding, with the exception of general sport bursaries, Innovation Fund bursaries, and the exemption of tuition fees for studies at CUT.
- c. Where donors/bursaries have specific criteria with regard to their allocation, those criteria will take preference.
- d. All students and employees of CUT must be familiar with this policy.

14.1.5 Eligibility of funding, prioritisation, elements that make up the package, limitations on funding, extent of funding and disbursements

Refer to the relevant Financial Aid manuals for details on the following:

- governing of the effective management of financial assistance to undergraduate students at CUT;
- academic and financial eligibility grounds in allocating funds;
- prioritisation when allocating funds (i.e. academic standing and the ranking in terms of need);
- the extent of funding and elements that make up the package (i.e. expected own contribution, costs that may be taken into consideration when making an award, the assessment of the funding package);

- limitations on funding (i.e. duration of funding, minimum and maximum awards, and NSFAS loans); and
- disbursements to students, landlords, donors and other relevant parties.
